

Cine-Digitar 1.33x XL Anamorphic

Cine-Digitar 1.33x M Anamorphic

Cine-Digitar 1.33x Anamorphic

The line-up of Schneider products will reshape and improve the entire Home Cinema experience.

- Cine-Digitar 1.33x Anamorphic lenses took the industry by storm in 2008 by bringing a true Cinemascope® experience to homes across America.
- Cine-Digitar M Anamorphic Lenses work with larger diameter zoom lenses and shorter throw ratios.
- Cine-Digitar XL Anamorphic Lenses for large projectors, large primary lenses, and short throw ratios.
- **NEW** Universal Kino Mount designed to mount a Kino lens deployment system to most projectors which utilize a ceiling pipe.

Today's digital projectors are bigger and deliver more light; focal points are smaller; home cinema screens are larger.

Our solution is without equal for big, bigger, biggest and best home cinema imaging!

The expanded line of Schneider products gives all home cinema dealers and installers an unprecedented wide range of unique solutions they can offer to their customers. These products allow discriminating home theatre owners to easily achieve incredible full-screen Cinemascope® images and eliminate "letterboxing," (the black bars that appear above and below the image when a 16:9 projector with a conventional lens projects a Cinemascope® movie).

Our solution is also without equal for easy deployment!

The Kino-Torsion and Kino-Linear deployment mechanisms are constructed for use in the most demanding home theatre or corporate screening

room applications. For easy lens alignment, both have simple adjustments for displacement, pitch, and roll. Automatic deployment is activated via a 12-volt trigger or contact closure.

The universal mounting bracket will attach our Kino-Linear and Kino-Torsion motorized anamorphic deployment devices to any ceiling mount. The bracket attaches to the 1 1/2 inch diameter pipe used in all ceiling mounts. 3 horizontal arms of various lengths are supplied, making installation possible with any projector.
