Circular Polarizers

The Digital Cinema Polarizers are for use in Two Projector 3D, which offers the brightest 3D projection on large screens. The circular polarizers are offered as pairs, right-hand and left-hand. Each unit is clearly labeled with laser engraved marking and factory pre-aligned. Each unit comes with a glass mounted level for ease of alignment on-site. The circular polarizers are designed with a thumb screw for ease of installation/securing and removal. These Polarizers fit all Schneider Optics DiStar Wide Angle Lenses between 22.4mm and 36.4mm.
